

Building Trust, One Roof at a Time

At Arctic Anchors, we're revolutionizing snow retention systems with innovative, high-performance products that deliver exceptional value at an affordable price. Recognizing the challenges roofing professionals face—high costs, cumbersome installations, and limited durability—we set out to create a solution that addresses these issues head-on.

Our products, crafted with proprietary TitanCore™ material, combine the strength of steel with ultra lightweight, corrosion-free design, ensuring long-lasting performance in even the harshest conditions. By maximizing UV resistance and offering flexible installation options, we've created systems that are both durable and cost-effective.

WHY ARCTIC ANCHOR?

- ▶ **PRE-INSTALLED SCREWS AND CLAMPS
STREAMLINE INSTALLATION**
- ▶ **ADAPTABLE TO ALL ROOF PROFILES WITH
ADD-ONS AND COLOR OPTIONS**
- ▶ **BUILT TO RESIST CORROSION, UV DAMAGE,
AND EXTREME TEMPERATURES**

Rail Series Snow Guard™

VISIT US AT BOOTH

#3044

Arctic Anchor Rail Series Snow Guard

Our rail system, engineered with TitanCore™, is 7x lighter than steel and withstands extreme conditions without corrosion or warping. Built for strength, it delivers superior performance in both durability and installation efficiency.

- › **RATED TO HANDLE INTENSE SNOW LOADS AND EXTREME CLIMATES**
- › **UV-STABILIZED TO WITHSTAND LONG-TERM SUN EXPOSURE**
- › **CUSTOMIZABLE WITH MULTIPLE COLOR OPTIONS TO MATCH ANY ROOF**

COMPLETE INTEGRATION

The rail system features tapered joiners and end caps for seamless alignment. Optional TitanCore ice blockers enhance protection by preventing dangerous ice slippage in critical areas.

TRIANGULAR RAIL

The triangular shape maximizes surface area to retain snow and prevent slippage, while offering a sleek, roof-matching design. It flexes under pressure and rebounds without damage, maintaining structural integrity over time.

- › **HOLDS 4,500LBS PER FOOT OR RAIL**
- › **SUPPLIED IN 7-FOOT SECTIONS FOR EASIER TRANSPORT AND HANDLING**
- › **ENHANCES ROOF APPEARANCE WITH A MODERN, SLOPE-ALIGNED PROFILE**

ICE STOPPER

Our 4-inch integrated ice stoppers sit flush with the roof, securing ice buildup while ensuring controlled melting and runoff.

- › **FLUSH DESIGN PREVENTS ICE FROM SLIPPING UNDERNEATH**
- › **CONTROLS MELTWATER FLOW TO REDUCE REFREEZING HAZARDS**
- › **ONE SOLID PIECE INJECTION-MOLDED WITH THE BRACKET FOR UNMATCHED DURABILITY**

REINFORCED BRACKETS

Our brackets are built to withstand heavy-duty performance and simplify installation. Available in 1-hole, 2-hole, and 3-hole options, they work seamlessly with our rail and clamps. The waffled base improves grip and promotes better bonding when using an adhesive, ensuring a secure and long-lasting installation.
